Omkar Mundhe

Immediate Joiner | Java Developer

Email: omkarm1750@gmail.com | Mobile: +91-8459278942 | Pune, Maharashtra | LinkedIn | GitHub

Immediate Joiner | Java Backend Developer with 1.4 years of experience in designing, developing, and supporting **scalable backend systems** using **Java, Spring Boot, Spring Data JPA, Hibernate, REST APIs, and Microservices architecture**. Strong hands-on experience with **MySQL** and **Apache Kafka** for building **event-driven applications**. Proficient in **Docker, GitHub Actions (CI/CD), AWS (EC2, S3), Git,** and **Maven**. Contributed to migrating a **monolithic e-learning platform to microservices**, delivered **10+ production REST APIs**, and cut notification latency by **30–40%** using **Kafka-based messaging**. Experienced in **Agile/Scrum sprints**, delivering **secure, reliable, and maintainable backend solutions**.

TECHNICAL SKILLS

- **Programming Languages:** Java 17/21
- **Frameworks & Libraries:** Spring Boot, Spring MVC, Spring Data JPA, JDBC, Microservices
- **Web Services & APIs:** RESTful APIs, JSON
- **Databases:** MySQL
- **Messaging & Streaming:** Apache Kafka
- **AI & Generative AI:** AI Tools, Generative AI, Prompt Engineering, AI-assisted Development
- **Cloud & DevOps:** AWS (EC2, S3), Docker, CI/CD
- **Tools & Version Control:** Git, Maven, Postman
- **Testing & Monitoring:** JUnit, Log4j
- **Other Skills:** API Integration, Performance Optimization, Production Debugging, Agile & Scrum

EXPERIENCE

- **Associate Software Engineer** | Mind Spark Technology | Jun 2026 – Present | Pune, India
- **Software Engineer Intern** | Mind Spark Technology | Jun 2025 – May 2026 | Pune, India

PROJECTS

- ### Project: E-Learning Platform (Monolith to Microservices Migration)

  Technologies: Java 21, Spring Boot, Spring Data JPA, Hibernate, REST APIs, Microservices, Eureka, Spring Cloud Gateway, MySQL, Docker, Postman, JUnit

  Responsibilities & Achievements:

- Contributed to migrating a **monolithic e-learning application** to a **Spring Boot microservices architecture**, improving **modularity, scalability, and maintainability**.
- Designed and delivered **10+ RESTful APIs** for the **Course and Category modules** using **Java 21, Spring Boot, and Spring Data JPA**.
- Implemented **CRUD operations, pagination, request validation, and centralized exception handling** across API endpoints.
- Implemented **service discovery and API routing** across distributed microservices using **Eureka and Spring Cloud Gateway**.
- Integrated **MySQL** through **JPA/Hibernate** for reliable persistent data storage.
- Containerized application services using **Docker and Docker Compose** for consistent local development.
- Tested and debugged **REST APIs** using **Postman and JUnit**, identifying and resolving **integration issues** to support platform reliability.
- Followed **Git-based workflows** with feature branching and peer code reviews, and participated in **Agile sprint ceremonies**.

- **Project: ConnectEdu – Club & Event Coordination Platform**

  Technologies: Java 21, Spring Boot, Microservices, API Gateway, Eureka, OpenFeign, Apache Kafka, MySQL, JWT, Spring Security, WebSocket, Razorpay, JasperReports, Docker, AWS S3, Flutter

Responsibilities & Achievements:

- Architected a **microservices-based system** using **Java, Spring Boot, an API Gateway, and Eureka service registry**.
- Built independent services for **users, clubs, events, discussions, certificates, notifications, and payments**, each with its own **MySQL** database, communicating via **OpenFeign** and **Kafka**.
- Secured **REST APIs** with **JWT authentication, Spring Security, and role-based access control (RBAC)**, enforcing stateless authorization for college admins, club admins, members, and students.
- Reduced **notification response time by 30–40%** by replacing synchronous REST calls with **Kafka-based asynchronous messaging**, improving system scalability and responsiveness.
- Automated **certificate generation** using **JasperReports**, stored certificates on **AWS S3**, and triggered **Kafka events** for email notifications; integrated **Razorpay** for secure event-registration payments.
- Enabled **real-time event discussions** using **WebSocket**, validating JWT and event membership before broadcasting messages and persisting chat history in the database.
- Containerized services with **Docker** and integrated **AWS S3** for scalable file storage, saving file URLs in the database to share attachments in event discussions.

- **Project: ContactSphere – Secure Contact Management System**

  Technologies: Java 21, Spring Boot, Spring Security, JWT, OAuth2, MySQL, Docker, Cloudinary

Responsibilities & Achievements:

- Developed a **secure contact management backend** using **Java 21, Spring Boot, and MySQL**.
- Implemented **JWT authentication, Google OAuth2 login, and two-factor authentication (2FA)** to protect user accounts.
- Implemented **role-based access control (RBAC), email verification, and password recovery** workflows.
- Integrated **Cloudinary** for cloud-based profile image storage.
- Containerized the application with **Docker** for streamlined deployment.

ROLES and RESPONSIBILITY

- Design, develop, and maintain **RESTful APIs** using **Java, Spring Boot, Spring Data JPA, and Hibernate**.
- Implement **CRUD operations, pagination, request validation, and centralized exception handling**.
- Implement **Microservices architecture** with **Eureka and Spring Cloud Gateway** for service discovery.
- Integrate **Apache Kafka** for asynchronous, event-driven messaging, reducing notification latency by **30–40%**.
- Secure applications using **JWT, Spring Security, OAuth2, and role-based access control**.
- Work with **MySQL** using **JPA/Hibernate** for persistent data storage.
- Containerize services with **Docker** and integrate **AWS S3** for scalable file storage.
- Test and debug APIs using **Postman, JUnit, and Mockito** to support platform reliability.
- Collaborate in **Agile/Scrum sprints**, participating in code reviews, debugging, and feature development.

EDUCATION

- **B.Tech (IT)** | Dr. J.J. Magdum College of Engineering | Jaysingpur, Maharashtra | 2022 – 2026 | CGPA: 8.7/10

CERTIFICATIONS

- **Master GenAI with Java and Spring Boot** – Udemy, 2025
- **Spring Boot & Microservices Certification** – Substring Technologies, 2025
- **Spring Framework Certification** – Coursera, 2024

SOFT SKILLS

- Problem-Solving
- Teamwork
- Adaptability
- Time Management
