Omkar Mundhe

Java Backend Developer | Software Engineer
Pune, Maharashtra, India | +91 9356511750 | omkarm1750@gmail.com | LinkedIn | GitHub

Professional Summary

Java Backend Developer with 1.3+ years of experience building scalable Spring Boot microservices and RESTful APIs using Java 21, Spring Data JPA, Hibernate, MySQL, Apache Kafka, and AWS. Migrated a monolithic platform into microservices, shipped 10+ production APIs, and cut notification latency by 30–40% via Kafka messaging. Skilled in Docker, CI/CD, and DSA, with a consistent track record of delivering reliable, production-ready backend systems.

Technical Skills

- **Languages:** Java 21, Python, SQL, Angular
- **Frameworks & Libraries:** Spring Boot, Spring MVC, Spring Data JPA, Hibernate, Spring Security
- **Architecture & Messaging:** Microservices, REST APIs, Apache Kafka, Eureka, Spring Cloud Gateway, Event-Driven Design
- **Databases:** MySQL, JPA/Hibernate ORM
- **DevOps & Cloud:** Git, GitHub Actions (CI/CD), Docker, AWS (EC2, S3), Maven
- **Testing & Tools:** JUnit 5, Mockito, Postman, Swagger/OpenAPI, IntelliJ IDEA
- **Core Concepts:** Object-Oriented Programming, Collections Framework, Data Structures & Algorithms, SDLC

Professional Experience

Mind Spark Technology — Pune, Maharashtra
Jun 2025 – Present

Associate Software Engineer — Jun 2026 – Present

- Designed and delivered 10+ RESTful APIs for the Course and Category modules using Java 21, Spring Boot, Spring Data JPA, and implementing CRUD operations, pagination, request validation, and centralized exception handling.
- Implemented service discovery and API routing across distributed microservices using Eureka and Spring Cloud Gateway, integrating MySQL via JPA/Hibernate for persistent data storage.
- Contributed to migrating a monolithic e-learning platform (LearnHub) to a Spring Boot microservices architecture, improving modularity, scalability, and long-term maintainability.

Software Engineer Intern — Jun 2025 – May 2026

- Tested and debugged REST APIs using Postman under guidance from senior engineers, identifying and resolving integration issues to support platform reliability and reduce production defects.
- Gained hands-on experience with Docker containerization and Git-based version control, participating in feature branching, peer code reviews, and Agile sprint ceremonies.

Projects

ConnectEdu – Club & Event Coordination Platform — Dec 2025 – Mar 2026
Java, Spring Boot, Microservices, Kafka, Flutter

- Architected a microservices-based system using Java, Spring Boot, an API Gateway, and Eureka service registry, and secured REST APIs with JWT authentication, Spring Security, and role-based access control (RBAC).
- Reduced notification response time by 30–40% by replacing synchronous REST calls with Kafka-based asynchronous messaging, improving system scalability and responsiveness.
- Enabled real-time event discussions using WebSocket, containerized services with Docker, and integrated AWS S3 for scalable file storage.

ContactSphere – Secure Contact Management System — Feb 2025 – Jun 2025
Java 21, Spring Boot, Spring Security, JWT, OAuth2, MySQL, Docker

- Developed a secure contact management backend using Java 21, Spring Boot, and MySQL, implementing JWT authentication, Google OAuth2 login, and two-factor authentication (2FA) to protect user accounts.
- Implemented role-based access control (RBAC), email verification, and password recovery workflows, integrated Cloudinary for cloud-based profile image storage, and containerized the application with Docker for streamlined deployment.

Certifications

- Master GenAI with Java and Spring Boot – Udemy, 2025
- Spring Boot & Microservices Certification – Substring Technologies, 2025
- Spring Framework Certification – Coursera, 2024

Education

Dr. J.J. Magdum College of Engineering, Jaysingpur, Maharashtra — 2022 – 2026
Bachelor of Technology in Information Technology — *CGPA: 8.7 / 10*
